

# Contents of volume 30

- No. 1 (pp 1-110) published 19 January 1989  
 No. 2 (pp 111-218) published 6 February 1989  
 No. 3 (pp 219-324) published 14 February 1989  
 No. 4 (pp 325-432) published 16 March 1989  
 No. 5 (pp 433-540) published 13 April 1989  
 No. 6 (pp 541-646) published 22 May 1989

## Mini-reviews

- Frommer W, Ager B, Archer L, Brunius G, Collins CH, Donikian R, Frontali C, Hamp S, Houwink EH, Küenzi MT, Krämer P, Lagast H, Lund S, Mahler JL, Normand-Plessier F, Sargeant K, Tuijnburg Muijs G, Vranich SP, Werner RG: Safe biotechnology. III. Safety precautions for handling microorganisms of different risk classes 541  
 Stewart CS, Flint HJ: *Bacteroides (Fibrobacter) succinogenes*, a cellulolytic anaerobic bacterium from the gastrointestinal tract 433

## Biotechnology

- Adlercreutz P: Oxidation of *trans*- and *cis*-1,2-cyclohexanediol by *Gluconobacter oxydans*. Preparation of (R)- and (S)-hydroxycyclohexanone 257  
 Asada M, Shuler ML: Stimulation of ajmalicine production and excretion from *Catharanthus roseus*: effects of adsorption in situ, elicitors and alginate immobilization 475  
 Bailey MJ, Poutanen K: Production of xylanolytic enzymes by strains of *Aspergillus* 5  
 Bayer, T, Zhou W, Holzhauser K, Schügerl K: Investigations of cephalosporin C production in an airlift tower loop reactor 26  
 Berg A-C, Holst O, Mattiasson B: Continuous culture with complete cell recycle: cultivation of *Pseudomonas cepacia* ATCC 29351 on salicylate for production of salicylate hydroxylase 1  
 Bestetti G, Galli E, Benigni C, Orsini F, Pelizzoni F: Biotransformation of styrenes by a *Pseudomonas putida* 252  
 Bugarski B, King GA, Jovanovic G, Daugulis AJ, Goosen MFA: Performance of an external loop air-lift bioreactor for the production of monoclonal antibodies by immobilized hybridoma cells 264  
 Cavazzoni V, Manzoni M, Parini C, Bonferoni MC: D-Xylanase produced by *Schizophyllum radiatum* 247  
 Cheng, CY, Yabe I, Toda K: Selective growth of a mutant in continuous culture of *Bacillus caldolyticus* for production of  $\alpha$ -amylase 125  
 Chavalier P, Roy D, Morin A: Hydatoinase activity of immobilized non-growing *Pseudomonas putida* cells 482  
 Doi M, Asahi S, Tsunemi Y, Akiyama S: Mechanism of uridine production by *Bacillus subtilis* mutants 234  
 Doyle EM, Kelly CT, Fogarty WM: The high maltose-producing  $\alpha$ -amylase of *Penicillium expansum* 492  
 du Preez JC, van Driessel B, Prior BA: Ethanol tolerance of *Pichia stipitis* and *Candida shehatae* strains in fed-batch cultures at controlled low dissolved oxygen levels 53  
 Eiteman MA, Gainer JL: In situ extraction versus the use of an external column in fermentation 614

- Fukushima Y, Itoh H, Fukase T, Motai H: Continuous protease production in a carbon-limited chemostat culture by salt tolerant *Aspergillus oryzae* 604  
 Gooijer CD de, Lier FLJ van, van den End EJ, Viak JM, Tramper J: A model for baculovirus production with continuous insect cell cultures 497  
 Gulik WM van, Meijer JJ, ten Hoopen HJG, Luyben KCAM, Libbenga KR: Growth of a *Catharanthus roseus* cell suspension culture in a modified chemostat under glucose-limiting conditions 270  
 Hörner T, Zähler H, Kellner R, Jung G: Fermentation and isolation of epidermin, a lanthionine containing polypeptide antibiotic from *Staphylococcus epidermidis* 219  
 Husemann MHW, Papoutsakis ET: Comparison between in vivo and in vitro enzyme activities in continuous and batch fermentations of *Clostridium acetobutylicum* 585  
 Hulst AC, Meyer MMT, Breteler H, Tramper J: Effect of aggregate size in cell cultures of *Tagetes patula* on thiophene production and cell growth 18  
 Izumi Y, Nath PK, Yamamoto H, Yamada H: NADPH production from NADP<sup>+</sup> with a glucose dehydrogenase system involving whole cells and immobilized cells of *Gluconobacter suboxydans* 337  
 Jensen SE, Wolfe S, Westlake DWS: Synthesis of the penicillin precursor,  $\delta$ -(L- $\alpha$ -aminoadipyl)-L-cysteinyl-D-valine (ACV), by an immobilized enzyme preparation 111  
 Kawase Y, Moo-Young M: Hydrodynamics in bubble column bioreactors with fermentation broths having a yield stress 596  
 Keshavarz T, Walker E, Eglin R, Lilley G, Holt G, Bull AT, Lilly MD: Immobilization of *Penicillium chrysogenum*: spore growth on Celite 487  
 Kittelmann M, Stamm WW, Follmann H, Trüper HG: Isolation and classification of acetic acid bacteria from high percentage vinegar fermentations 47  
 Klein D, Yanai P, Hofstein R, Fridlender B, Braun S: Production of *Bacillus sphaericus* larvicide on industrial peptones 580  
 Kunioka M, Kawaguchi Y, Doi Y: Production of biodegradable copolyesters of 3-hydroxybutyrate and 4-hydroxybutyrate by *Alcaligenes eutrophus* 569  
 Lastick SM, Tucker MY, Beyette JR, Noll GR, Grohmann K: Simultaneous fermentation and isomerization of xylose 574  
 Lee YH, Lee CW, Chang HN: Citric acid production by *Aspergillus niger* immobilized on Polyurethane foam (Short contribution) 141  
 Meyer CL, Papoutsakis ET: Increased levels of ATP and NADH are associated with increased solvent production in continuous cultures of *Clostridium acetobutylicum* 450  
 Mulchandani A, Luong JHT, Groom C: Substrate inhibition kinetics for microbial growth and synthesis of poly- $\beta$ -hydroxybutyric acid by *Alcaligenes eutrophus* ATCC 17697 11  
 Nakamichi K, Nabe K, Nishida Y, Tosa T: Production of L-phenylalanine from phenylpyruvate by *Paracoccus denitrificans* containing aminotransferase activity 243  
 Nava Saucedo JE, Barbotin J-N, Thomas D: Continuous production of gibberellic acid in a fixed-bed reactor by immobilized mycelia of *Gibberella fujikuroi* in calcium alginate beads 226  
 Qureshi N, Cheryan M: Production of 2,3-butanediol by *Klebsiella oxytoca* 440

- Rao G, Mutharasan R: NADH levels and solventogenesis in *Clostridium acetobutylicum*: new insights through culture fluorescence 59
- Rao M, Mishra C: Glucohydrolase from *Penicillium funiculosum* 130
- Sanseverino J, Montenecourt BS, Sands JA: Detection of acrylic acid formation in *Megasphaera elsdenii* in the presence of 3-butyric acid 239
- Schuch R, Mukherjee KD: Lipase-catalyzed reactions of fatty acids with glycerol and acylglycerols 332
- Shimizu H, Shioya S, Suga K, Takamatsu T: Profile control of the specific growth rate in fed-batch experiments 276
- Stamm WW, Kittelmann M, Follmann H, Trüper HG: The occurrence of bacteriophages in spirit vinegar fermentation 41
- Stewart PS, Robertson CR: Microbial growth in a fixed volume: studies with entrapped *Escherichia coli* 34
- Sukara E, Doelle HW: A one-step process for the production of single-cell protein and amyloglucosidase 135
- Takami H, Akiba T, Horikoshi K: Production of extremely thermostable alkaline protease from *Bacillus* sp. no. AH-101 120
- Tanaka T, Yamamoto K, Towprayoon S, Nakajima H, Sonomoto K, Yokozeki K, Kubota K, Tanaka A: Continuous production of L-serine by immobilized growing *Corynebacterium glycinophilum* cells 564
- Toda K, Park YS, Asakura T, Cheng CY, Ohtake H: High-rate acetic acid production in a shallow flow bioreactor 559
- Wang HY, Palanki S, Hyatt GS: Application of affinity adsorption in thienamycin fermentation 115
- Xu D-B, Kubicek CP, Röhr M: A comparison of factors influencing citric acid production by *Aspergillus niger* grown in submerged culture and on filter paper 444
- Xu D-B, Madrid CP, Röhr M, Kubicek CP: The influence of type and concentration of the carbon source on production of citric acid by *Aspergillus niger* 553
- Yamaji H, Fukuda H, Nojima Y, Webb C: Immobilisation of anchorage-independent animal cells using reticulated polyvinyl formal resin biomass support particles 609
- Yerushalmi L, Volesky B, Votruba J, Molnar L: Circadian rhythmicity in a fermentation process? 460
- Yi Z-H, Rehm H-J: Identification and production of  $\Delta^2$ -cis-1,18-octadecenedioic by *Candida tropicalis* 327
- Fang A, Demain AL: A new chemically-defined medium for RAC-certified and other strains of *Bacillus subtilis* 144
- Gopal CV, Broad D, Lloyd D: Bioenergetic consequences of protein overexpression in *Saccharomyces cerevisiae* 160
- Jaurin B, Granström M:  $\beta$ -Glucosidase genes of naturally occurring and cellulolytic *Streptomyces* species: characterization of two such genes in *Streptomyces lividans* 502
- Katz E, Brown D: A possible role of D-valine and related D-amino acids in repression of enzyme and actinomycin synthesis 67
- Lang-Hinrichs C, Berndorff D, Seefeldt C, Stahl U: G418 resistance in the yeast *Saccharomyces cerevisiae*: comparison of the neomycin resistance genes from Tn5 and Tn903 388
- Markwell J, Frakes LG, Brott EC, Osterman J, Wagner FW: *Aspergillus niger* mutants with increased glucose oxidase production 166
- Meinhardt F, Stahl U, Ebeling W: Highly efficient expression of homologous and heterologous genes in *Bacillus megaterium* 343
- Mohr G: Rapid detection of bacterial hygromycin B phosphotransferase in *Aspergillus niger* transformants 371
- Murakami Y, Furusato T, Kato C, Habuka N, Kudo T, Horikoshi K: Construction of new excretion vectors: two and three tandemly located promoters are active for extracellular protein production from *Escherichia coli* 619
- Osiwacz HD, Weber A: DNA mediated transformation of the filamentous fungus *Curvularia lunata* using a dominant selectable marker 375
- Sato N, Hayami T, Murata K, Watanabe K, Kariya Y, Sakaguchi M, Kimura S, Nonaka M, Kimura A: Expression of tuna growth hormone cDNA in *Escherichia coli* 153
- Schmucker R, Gülland U, Will M, Hillen W: High level expression of *Acinetobacter calcoaceticus* mutarotase in *Escherichia coli* is achieved by improving the translational control sequence and removal of the signal sequence 509
- Sugita T, Komatsubara S: Construction of a threonine hyper-producing strain of *Serratia marcescens* by amplifying the phosphoenolpyruvate carboxylase gene 290
- Takao M, Morioka T, Yamagata H, Tsukagoshi N, Uda S: Production of swine pepsinogen by protein-producing *Bacillus brevis* carrying swine pepsinogen cDNA 75
- van Engelenburg F, Smit R, Goosen T, van den Broek T, Tudzynski P: Transformation of *Claviceps purpurea* using a bleomycin resistance gene 364
- Wolf H, Pühler A, Neumann E: Electrotransformation of intact and osmotically sensitive cells of *Corynebacterium glutamicum* 283
- Yu P-L, Appleby RD, Pritchard GG, Limsowtyn GKY: Restriction mapping and localization of the lactose-metabolizing genes of *Streptococcus cremoris* pDI-21 71

## Applied genetics and regulation

- Almond EL, Clark AJ, Clark DS: Complementation of a *thr-1* mutation of *Escherichia coli* by DNA from the extremely thermophilic archaeobacterium *Methanococcus jannaschii* 148
- Amore R, Wilhelm M, Hollenberg CP: The fermentation of xylose—an analysis of the expression of *Bacillus* and *Actinoplanes* xylose isomerase genes in yeast 351
- Ashikari T, Kiuchi-Goto N, Tanaka Y, Shibano Y, Amachi T, Yoshizumi H: High expression and efficient secretion of *Rhizopus oryzae* glucoamylase in the yeast *Saccharomyces cerevisiae* 515
- Barrett V, Lemke PA, Dixon RK: Protoplast formation from selected species of ectomycorrhizal fungi 381
- Birr E, Wohleben W, Aufderheide K, Schneider T, Pühler A, Bräu B, Marquardt R, Wöhner G, Präve P, Schlingmann M: Isolation and complementation of mutants of *Streptomyces coelicolor* "Müller" DSM3030 deficient in lysozyme production 358

## Applied microbiology

- Baillargeon MW, Bistline RG jr, Sonnet PE: Evaluation of strains of *Geotrichum candidum* for lipase production and fatty acid specificity 92
- Bibal B, Vayssier Y, Tournou M, Pareilleux A: Enhanced inhibitory effect of lactic acid on growth kinetics of *Streptococcus cremoris* during nutritional medium limitations 630

- Blaich R, Heintz C, Wind R: Studies on conidial germination and initial growth of the grapevine powdery mildew *Uncinula necator* on artificial substrates 415
- Boquien CY, Corrieu G, Desmazeaud MJ: Enzymatic methods for determining populations of *Streptococcus cremoris* AM2 and *Leuconostoc lactis* CNRZ 1091 in pure and mixed cultures 402
- Borch E, Molin G: The aerobic growth and product formation of *Lactobacillus*, *Leuconostoc*, *Brochothrix*, and *Carnobacterium* in batch cultures 81
- Brivonese AC, Sutherland IW: Polymer production by a mucoid strain of *Azotobacter vinelandii* in batch culture 97
- Carrier DJ, Luong JHT, Weber ME: Substrate consumption of *Methylomonas mucosa* 89
- Edwards N, Beeton S, Bull AT, Merchuk JC: A novel device for the assessment of shear effects on suspended microbial cultures 190
- Heitzer A, Al-Awadhi N, Hamer G: Some effects of heat shocks on bacterial growth 408
- Kirkpatrick N, Palmer JM: A natural inhibitor of lignin peroxidase activity from *Phanerochaete chrysosporium*, active at low pH and inactivated by divalent metal ions 305
- Lin DG, Nishio N, Mazumder TK, Nagai S: Influence of  $\text{Co}^{2+}$ ,  $\text{Ni}^{2+}$  and  $\text{Fe}^{2+}$  on the production of tetrapyrroles by *Methanosarcina barkeri* 196
- Madi E, Antranikian G: Identification of a starch degrading anaerobic thermophile producing thermostable  $\alpha$ -amylase and pullulanase (Short contribution) 422
- Mishra P, Prasad R: Relationship between ethanol tolerance and fatty acyl composition of *Saccharomyces cerevisiae* 294
- Neve H, Krusch U, Teuber M: Classification of virulent bacteriophages of *Streptococcus salivarius* subsp. *thermophilus* isolated from yoghurt and Swiss-type cheese 824
- Peleg Y, Barak A, Scrutton MC, Goldberg I: Malic acid accumulation by *Aspergillus flavus*. III.  $^{13}\text{C}$  NMR and isoenzyme analyses 176
- Raucourt A de, Girard D, Prigent Y, Boyaval P: Lactose continuous fermentation with cells recycled by ultrafiltration and lactate separation by electrodialysis: modelling and simulation 521
- Raucourt A de, Girard D, Prigent Y, Boyaval P: Lactose continuous fermentation with cells recycled by ultrafiltration and lactate separation by electrodialysis: model identification 528
- Sára M, Sleytr UB: Use of regularly structured bacterial cell envelope layers as matrix for the immobilization of macromolecules 184
- Schmidt A, Bringer-Meyer S, Poralla K, Sahm H: Influence of ethanol on the activities of 3-hydroxy-3-methylglutaryl-coenzyme A-reductase and squalenehopene-cyclase in *Zymomonas mobilis* 170
- Sharma HSS, Gilmore C: Screening of biocides for controlling spoilage of bleached flax roves caused by fungal saprophytes 636
- Smith MR, Ratledge C: Catabolism of biphenyl by *Pseudomonas* sp. NCIB 10643 and *Nocardia* sp. NCIB 10503 395
- Svarachorn A, Shinmyo A, Tsuchido T, Takano M: Autolysis of *Bacillus subtilis* induced by monovalent cations 299

## Environmental microbiology

- Dubach AC, Schneider K, Bachofen R: Anaerobic fermentation of fructose in a mixed culture of fermentative and methanogenic bacteria 201
- Ehrhardt HM, Rehm H-J: Semicontinuous and continuous degradation of phenol by *Pseudomonas putida* P8 adsorbed on activated carbon 312
- Knoll G, Winter J: Degradation of phenol via carboxylation to benzoate by a defined, obligate syntrophic consortium of anaerobic bacteria 318
- Mulder R, Simons B, Verkuiljen J, Mattos MJT de, Neijssel OM: Biomass retention in a glucose acidifying anaerobic gas-lift reactor: isolation of the organism responsible granule formation 641
- Oldenhuis R, Kuijk L, Lammers A, Janssen DB, Witholt B: Degradation of chlorinated and non-chlorinated aromatic solvents in soil suspensions by pure bacterial cultures 211
- Poulsen OM, Petersen LW: Growth and enzyme production of *Cellulomonas* sp. ATCC 21399 on microcrystalline cellulose. Effects of increasing concentration of a mineral medium 535
- Zache G, Rehm H-J: Degradation of phenol by a coimmobilized entrapped mixed culture 426
- Zimmermann W, Broda P: Utilization of lignocellulose from barley straw by actinomycetes 103
